The Washington correspondent of one of the New-York papers says, we see, in a letter of the American fleet in the Pacific is amply sufficient to shut up every Port of Mexico on that shore as scon New-York papers says, we see, in a letter of the 14th instant, "it may yet appear necessary, before the termination of the session (of Congress) to pass a bill authorizing a loan, to meet the extras."

Doubtless Congress will find itself under the necessity, before adjourning, of providing money, in addition to the current revenue, to defray the expenditure which will attend the now inevitable military operations of the Government. The reduction of the Tariff of duties on imports, had it been carried into effect, would equally have induced the neces-sity, now or not long hereafter, of supplying reve-nue from some other source. But the late act of Congress—and, indeed, independently of the moveee reported a bill to remit the duties on railroad ecutive—requiring an expenditure probably far to exceed the surplus in the Treasury, may be considered as an indefinite postponement of the Treasury scheme for a general reduction of the Tariff.

To the Editor of The Tribune:
As the subject of Hydropathy at the present time is attracting the notice both of the Medical Profession and those who need the aid of its healing powers, it

may not be amiss to give you a brief sketch of some important cases which have been restored by hydristic means, as proof of its efficacy in the treatment of disease. Since the opening of the Morristown 'Water Cure' Institution, many cases of various diseases have been the following two cases, (one of which has been before the public, over the signature of the individual himself.) as exhibiting the immediate effects of this agent in Dyspepsis and Scrofula.

Rev. J. S. Kidner, entered March 7th, with Dyspepsia of some three years' standing. The disease commenc with derangement of the bowels, which at first was regulated by diet, and occasional cathartic doses of medicine, About a year from the first strack, after being better and About a year from the arm street, after owing better and worse several times, the marked and positive symptoms of Dyspepsia became manifest—Settled derangement of stomach and bowels, gradual loss of deeb, frequency of pulse, furred and swollen tongue, palpitation of the heart, sickness, unplessant sensation in the head, general weakness, and inability for both physical and mental

entered Feb. 12. Her disease was Pinea Capitis, or Scald supposed at first to have contracted the disease from seemed involved in the difficulty, the local manifestations diseased, the spine being cancered to some extent; the right shoulder considerably elevated; howels very ir regular; pains in various parts of the body. She had lost much desh, and had periodical attacks of fever once in 24 hours. For three or four months previous to entering she had cough and expectoration, and her friends apprehended consumption at no distant period. The details of treatment may not be interesting, and I have only to say, that at this time she is extirely free from disease. The scaip is without spot or blemish, and the hair is rapidly covering the denuded spots. All the symptoms of indigestion, the cough pairs, &c. &c. have disappeared, and she is now as well and as active as any child who has never been diseased. This case you have seen yourself, and can bear witness if it be exaggrated. The rapidity with which the applications of water have mastered these two cases, which had been submitted to the treatment of drugs at the hands of skillful men, is satisfactory evidence that the advocates of Hydropathy do not profess to accomplish more than they are able to perform. In these cases water alone was used, and present them as they are. One of them can be seen at the lastitution, and the other I am expecting to return to finish his course of treatment in a few weeks.

I am yours, &c. GEORGE T. DEXTER.

The public will bear in mind that I never publish a certificate unless my Pointonic Syrup has actually made the cure; therefore all the cases that I publish are strictly true. I have a great number of new and interesting cures, which will be published in a short time, which will go to prove that SCHENCK'S PULMONIC SYRUP has cured more patients itsu any other medicine ever a now no fin this country. Prepared and sold, wholesale and retail, at the proprietor's office, No. 4 Cortland-at, where persons can receive advice, and have their longs examined with the Sisthescope by a regular physician, free of charge, and obtain pamphlets gratis.
